📱 MobileCoding 🐙 Ozdemiroguz

### Profile

I'm a mobile developer specializing in **Flutter**, backend development (**Node.js**, **MongoDB**, **MySQL**), and **Firebase services**, with over three years of hands-on experience building my own projects. Since early 2022, I've published four apps on the App Store and two on the Play Store. In my work, I focus on **AI-powered solutions**, integrating technologies like **OpenAI (ChatGPT)**, **Gemini**, and other models to create innovative, smart applications. Over the past year, I've also expanded into **native iOS development with Swift**, strengthening my skill set across platforms.

My goal is to become a **full-stack mobile developer**, combining Flutter, native mobile expertise, and AI technologies to build advanced, intelligent applications.

### Professional Experience

<b>Nodelabs Software</b> <i>Mobile Developer (Flutter)</i>	07/2025 - Present Remote
<b>Iwwomi</b> <i>Mobile Programmer (Flutter-Node.js)</i> 	02/2025 - 07/2025 İstanbul, Turkey
<b>JuniusTech</b> <i>Mobile Programmer (Flutter-Node.js)</i>	03/2024 - 01/2025
<b>PITON Technology</b> <i>Flutter Developer Intern</i> 	08/2023 - 01/2024 Eskişehir
<b>FLO Group</b> <i>FLO Online Internship Program</i> While developing remote projects, I participated in online internship meetings.	07/2024 - 08/2024 Online
<b>Eltagron</b> <i>Mobile Developer (Flutter-Node.js-MySQL)-Volunteer</i> 	09/2022 - 08/2023 Eskişehir

### Projects

#### **JoyLive: Live Stream & Meet**

A sophisticated live streaming platform developed at NodeLabs Software. Contributed to the development of key features including real-time video streaming, user interactions, and robust backend integration. The app provides seamless live broadcasting experience with modern Flutter architecture and scalable solutions.

### Movie App v2 - Clean BLoC Architecture

- Rebuilt with **BLoC**, **Clean Architecture**, **Dependency Injection**
- Feature-based, scalable structure
- Integrated **Firebase Crashlytics** & custom **Logger**
- API layer with **Dio** and **Repository Pattern**

### TRHaber Mobile App (May 2025 Release)

05/2025 - 05/2025

- Developed new version for **TRHaber**, a major news platform reaching thousands daily
- Published on **App Store** & **Play Store**
- Built while working at **IWWOMI**
- Replaced the old version with improved performance & modern features

### TaxiEMS Mobile App (2025 Release)

- Developed at **IWWOMI**, recently launched and currently undergoing testing
- Taxi app with integrated **Stripe payment system**
- Built to provide a seamless ride-booking experience

### SoundCare: Speaker Cleaner

A professional speaker cleaning application that uses sound frequencies to remove water and dust from phone speakers. Features premium subscription management with RevenueCat, monetization through Google Ads, and comprehensive analytics with Firebase. The app provides an effective solution for maintaining speaker quality and clarity.

### Cepte Dershane-Sınav Asistanı | Play Store and App Store

- Comprehensive project covering:
- Extensively uses **Firestore services**: Authentication, Firestore, Storage, Cloud Functions
- Integrated **OpenAI (ChatGPT)** and **Google Gemini APIs**
- 🚀 **Available on the store!**

### PureLLM - On-Device AI Model Runner-App Store

01/2025 - 02/2025

- **PureLLM**: Swift app running local AI models with **MediaPipe**, ensuring privacy, speed & offline use
- Combined **Flutter** UI with native Swift to bridge MediaPipe seamlessly
- Supports PyTorch-converted models without cloud reliance
- 🚀 **Available on the store!**

### Site Management App

07/2024

- Flutter site management app, built as my **graduation project**
- Not my masterpiece, but shows **three apps working together**
- Uses **Firestore & ZegoCloud** (Auth, Firestore, Functions, Storage)
- Follows **Clean Architecture** for scalability & maintainability

### Flutter Smart Home Mobile App and API with Node.js/MySQL

- First major **Flutter project**
- Developed with **Eltagron** at university techno park
- Set up & managed **MySQL backend**

## Education

### Computer Engineering

09/2020 - 07/2024

ESKİSEHIR OSMANGAZI UNIVERSITESI

Eskişehir

## Awards

Second Place / Google Developer Student Clubs Hackathon'24 

09/06/2024
