👤 Profile

I'm a mobile developer specializing in **Flutter**, backend development (**Node.js**, **MongoDB**, **MySQL**), and **Firebase services**, with over three years of hands-on experience building my own projects. Since early 2022, I've published four apps on the App Store and two on the Play Store. In my work, I focus on **AI-powered solutions**, integrating technologies like **OpenAI (ChatGPT)**, **Gemini**, and other models to create innovative, smart applications. Over the past year, I've also expanded into **native iOS development with Swift**, strengthening my skill set across platforms.

My goal is to become a **full-stack mobile developer**, combining Flutter, native mobile expertise, and AI technologies to build advanced, intelligent applications.

💼 Professional Experience

Iwwomi

Mobile Programmer(Flutter-Node.js) ↗

02/2025 - present

İstanbul, Turkey

JuniusTech

Mobile Programmer(Flutter-Node.js)

01/2024 - 01/2025

PITON Technology

Flutter Developer Intern ↗

08/2023 - 01/2024

Eskişehir

FLO Group

FLO Online Internship Program

While developing remote projects, I participated in online internship meetings.

07/2024 - 08/2024

Online

Eltagron

Mobile Developer(Flutter-Node.js-MySQL)-Volunteer ↗

06/2022 - 08/2023

Eskişehir

📁 Projects

Movie App v2 - Clean BLoC Architecture ↗

- Rebuilt with **BLoC**, **Clean Architecture**, **Dependency Injection**
- Feature-based, scalable structure
- Integrated **Firebase Crashlytics** & custom **Logger**
- API layer with **Dio** and **Repository Pattern**

TRHaber Mobile App (May 2025 Release) ↗

05/2025 - 05/2025

- Developed new version for **TRHaber**, a major news platform reaching thousands daily
- Published on **App Store & Play Store**

- Built while working at **IWWOMI**
- Replaced the old version with improved performance & modern features

TaxiEMS Mobile App (2025 Release) ↗

- Developed at **IWWOMI**, recently launched and currently undergoing testing
- Taxi app with integrated **Stripe payment system**
- Built to provide a seamless ride-booking experience

Cepte Dershane-Sınav Asistanı | Play Store and App Store ↗

- Comprehensive project covering:
- Extensively uses **Firebase services**: Authentication, Firestore, Storage, Cloud Functions
- Integrated **OpenAI (ChatGPT)** and **Google Gemini APIs**
- 🚀 Available on the store!

PureLLM - On-Device AI Model Runner-App Store ↗

01/2025 – 02/2025

- **PureLLM**: Swift app running local AI models with **MediaPipe**, ensuring privacy, speed & offline use
- Combined **Flutter** UI with native Swift to bridge MediaPipe seamlessly
- Supports PyTorch-converted models without cloud reliance
- 🚀 Available on the store!

JavaScript Projects ↗

Freelance Flutter Developer - First Aid App (Provider, Firebase, Speech-to-Text, Gemini) ↗

09/2024

- Built a **first aid app** for Adresoft
- Used **Flutter**, Provider, Firebase, Speech-to-Text & **Gemini**

ToDoDys-Mobile Application develop with Flutter ↗

- Special education app for children with learning difficulties
- Developed as a freelancer with **JuniusTech**
- 🎯 Pixel-perfect Figma designs for seamless, accessible UX

Site Management App ↗

07/2024

- Flutter site management app, built as my **graduation project**
- Not my masterpiece, but shows **three apps working together**
- Uses **Firebase & ZegoCloud** (Auth, Firestore, Functions, Storage)
- Follows **Clean Architecture** for scalability & maintainability

GreenScore/Recycling App with Flutter/Firebase/hooks_riverpod/Gemini ↗

- Started at **Google DSC Hackathon**, won **second place**
- Integrated **Gemini API** with advanced camera features
- Used **Firebase** backend & maps
- Implemented state management with **Riverpod**

Flutter Smart Home Mobile App and API with Node.js/MySQL ↗

- First major **Flutter project**
- Developed with **Eltagron** at university techno park
- Set up & managed **MySQL backend**
