Istanbul, Türkiye · Open to Onsite / Hybrid / Relocation

SUMMARY

Mobile engineer with 3+ years shipping production Flutter apps to iOS and Android, including 8+ live App Store apps, 2 published open-source packages on pub.dev, and a 4.7k-review production rebuild that improved startup by ~44%. Day-to-day work covers Bloc, RevenueCat tiered subscriptions, AdMob freemium, Firebase Analytics + Mixpanel funnels, and Crashlytics. Strong in scalable architecture, native bridges (Swift / Kotlin), and full release ownership across App Store Connect and Google Play.

EXPERIENCE

Nodelabs Software

06/2025 — Present

Mobile Engineer (Flutter)

Remote

- Built and optimized production Flutter apps across 10+ projects using Clean Architecture and Bloc.
- Improved app startup by ~44% through state hoisting, asset deferral, and resource optimization.
- Led architectural refactor of a 4.7k+ review production app, modularizing features and stabilizing release quality.
- Built and iterated payroll and subscription flows with RevenueCat, instrumented Firebase Analytics + Mixpanel funnels for conversion, and used Crashlytics for subscription-flow stability.
- Shipped real-time voice and video on iOS and Android using VideoSDK with WebSocket-based signaling.
- Accelerated refactoring and test scaffolding using Claude Code and Cursor across legacy Flutter modules.

Iwwomi

01/2025 — 06/2025

Mobile Engineer (Flutter · Node.js)

Istanbul

- Led migration and Bloc-based rewrite of TRHaber — a major news platform reaching thousands of daily users — shipping to App Store and Google Play with improved performance and scalability.
- Built customer- and driver-facing apps for a ride-hailing platform, integrating Stripe payments with idempotent retry handling.
- Built Node.js / Express endpoints powering driver dispatch and ride-state sync between mobile clients.

JuniusTech

03/2024 — 12/2024

Mobile Engineer (Flutter · Node.js)

Freelance

- Shipped a special-needs-focused Flutter (Provider) + Node.js app with REST API integrations.
- Owned mobile feature delivery with product and backend teams, focused on accessibility and clean code.

Freelance & Independent Developer

2023 — Present

Mobile Engineer (Flutter)

Remote

- Delivered production Flutter apps to global Fiverr clients with a 5.0★ rating across mobile delivery work.
- Published consumer apps live on the App Store, earning the first \$1,000+ as indie validation.

PITON Technology

09/2022 — 08/2023

Flutter Developer Intern

Eskişehir

- Built Flutter features in a professional product environment using Provider and Clean Architecture.
- Collaborated with senior engineers on shared codebases, code reviews, and release-quality implementation.

SELECTED PROJECTS

Apple Developer Profile — Live App Store Apps | App Store Connect · TestFlight · Release lifecycle

- Own and ship 8+ utility & productivity apps on the App Store as solo indie developer — SoundCare, Gallery Cleaner, Subi, Random Picker, QR Craft, Focsy, Inventory Scanner, PureLLM.
- Run end-to-end release lifecycle: TestFlight betas, paywall A/B iteration, App Store Connect price tier optimization, and post-launch crash and funnel monitoring.

ImageFlow — Real-Time Image Processing Pipeline | Flutter · Swift (Vision) · Kotlin (OpenCV) · Method Channels

- Built a sub-200ms on-device face and document detection pipeline bridging Flutter to native Swift/Kotlin via Method Channels, with no cloud round-trip.

Published pub.dev Packages | Flutter · Dart · Open-Source (MIT)

- document_scan — headless document scanner: corner detection & perspective correction via native Apple Vision (iOS) / OpenCV (Android), isolate-based.
- image_compressor — compress an image to a target file size in a single call.

SoundCare — Speaker Cleaner | Flutter · RevenueCat (6 tiers) · AdMob · Firebase · Mixpanel

- Indie utility app on the App Store with 6 RevenueCat subscription tiers (day-pass to lifetime), AdMob freemium, and Firebase Analytics + Mixpanel custom events for paywall iteration.

Subi — Bills & Subscriptions | Flutter · Firebase Auth · Firestore · RevenueCat

- Personal finance utility tracking recurring bills and subscriptions — **Firebase Auth (email)** with **Firestore cloud sync** across devices, RevenueCat monthly/yearly tiers, push notifications for payment reminders.
- Offline-first guest mode — full app usable without an account, with seamless upgrade to authenticated cloud sync when the user signs in.

TECHNICAL SKILLS

Languages & Frameworks: Dart, Flutter, Swift (integrations), Kotlin (integrations), Node.js, Express.js, JavaScript, TypeScript

State & Architecture: Bloc, Riverpod, Provider, Clean Architecture, MVVM, modular features

Monetization & Analytics: RevenueCat (tiered subscriptions), AdMob (freemium), Firebase Analytics, Mixpanel, Crashlytics, App Store Connect price tier optimization

Backend & Realtime: REST, WebSocket, VideoSDK, Firebase, MongoDB, Method Channels

Release & Tooling: Xcode, Android Studio, App Store Connect, TestFlight, GitHub Actions, Fastlane, Sentry, Git

Testing: Unit, Widget, Integration, end-to-end (E2E), crash-free session monitoring

Open Source & AI Tooling: 2 published pub.dev packages (document_scan, image_compressor), Claude Code, GitHub Copilot, Cursor, Codex

EDUCATION

Eskişehir Osmangazi University

B.Sc. Computer Engineering

2020 — 2025

Eskişehir

AWARDS & LANGUAGES

Second Place — GDSC Hackathon '24 — Flutter app integrating Gemini AI + Firebase, 20+ competing teams

09/2024

Languages: Turkish (Native) · English (C1, Advanced) · **Open Source:** 45+ public GitHub repos (Flutter, Dart, Node.js)
